## COLLECTION of HIDDEN

**Designer** Ufuk CEYLAN

## HIDDEN C COFFEE TABLE

Standing out with its material diversity and geometric forms, the HIDDEN series takes its place in the upper segment design world with its nostalgic design approach and fine craftsmanship. Standing out with its dark tones, the collection manages to fascinate with its elegance regardless of product size. HIDDEN C coffee table, which stands out with its elegant form with its Emperador Dark marble leg and brass connector, is one of the complementary products you feel lacking.

**HIDDEN C COFFEE TABLE**

**DIMENSIONS**

H: 64 cm / 25,6 inc  
 D: 48 cm / 18,9 inc  
 W: 48 cm / 18,9 inc

**USER GUIDE**

**USER GUIDE OF BRASS AND IRON**

Avoid leaving household liquids (oil, red wine, vinegar, etc.) on the surface. In particular, products that contain citric acid (present for example in fruit, citrus fruit and tomatoes) act on contact with the treated surface, removing its original sheen. Always clean stains while they are still fresh. For routine maintenance use a microfiber cloth and water. Do not use products containing acids.

**USER GUIDE OF MARBLE**

Marble is crystalline limestone rock composed primarily of calcium carbonate. As a natural material, colour variations, whether overall or in the veins and marks even within the same slab, are considered characteristic. The product may change by itself, acquiring an appearance that makes it all the more prized and unique the more it shows signs of age. Over time, such surfaces may deteriorate and/or mark (marks bring more noticeable with a pale colour). It is therefore advisable to avoid leaving cleaning products or household liquids (oil, red wine, vinegar, etc.) on the surface. In particular, products that contain citric acid (present for example in fruit, citrus fruit and tomatoes) act on contact with the treated surface, removing its original sheen. Always clean stains on surfaces while they are still fresh. To reduce risk, we treat the marble according to the most advanced waterproofing technology. Yet even the best waterproofing treatment, such as the one we apply, becomes less effective normally after two or three months, depending on your use of the surface. Therefore it is very important to renew the treatment regularly using the recommended product supplied. To apply this, carefully follow the instructions printed on the package, bearing in mind however, that the treatment does not make the surface immune to the effects of acidic substances (such as lemon juice).
